ABOUT BUKHATIR GROUP

Bukhatir Group stands as one of the UAE's largest and most diversified business conglomerates, with core interests in construction, education, IT, real estate, sports, and retail. Spanning regions from North America to North Africa, and West and South Asia, Bukhatir Group is committed to driving progress on a global scale.

With a turnover exceeding AED 3 billion, Bukhatir Group employs a dynamic workforce of over 70 nationalities, fostering a collaborative environment focused on innovation, career development, and well-being. We are dedicated to empowering talent at all levels, offering resources for professional growth and creating an inclusive workplace where individuals can thrive.

As we continue to expand beyond the UAE, Bukhatir Group remains focused on building a legacy of business success and social impact, shaping a future where progress and excellence go hand in hand.

CEO MESSAGE

Since 1976, Bucomac has been a trusted partner in shaping the UAE's growth, delivering high-quality blocks, interlocks, and kerbstones for diverse projects and landscapes.

With production facilities in Sharjah, Dubai, and Abu Dhabi, we ensure reliable coverage across the UAE market. Our commitment to innovation, sustainability, and customer satisfaction drives everything we do. By investing in advanced technology and the growth of our people, we continue to build enduring partnerships and support the nation's progress.

CEO MESSAGE

OUR VISION

At Bucomac we strive to lead the UAE in providing top-quality, sustainable building products that shape innovative and enduring projects.

OUR MISSION

To deliver top-quality, sustainable building materials from production to delivery, ensuring our clients' success through innovation, skilled expertise, and exceptional service at every stage.

OUR VALUES

- B** Best people working together as a united team.
- U** Uphold the highest standards of integrity and respect in all actions.
- C** Customer commitment drives our service excellence.
- O** Oversee quality control to deliver outstanding products.
- M** Make work enjoyable, reward good performance, and prioritize health and safety.
- A** A strong will to succeed in the marketplace.
- C** Constantly improve and innovate to stay ahead.

OF SUCCESSFUL OPERATIONS

Since 1976, Bucomac has evolved into a leading name in the UAE construction industry, specializing in the production of high-quality concrete masonry blocks, interlocking tiles, and kerbstone.

With a commitment to innovation and excellence, we operate multiple facilities capable of producing over 220,000 concrete blocks daily, along with 10,000 m² of pavers and 2,000 LM of kerbstones from the most technically advanced manufacturing plants in the region. Our growth is driven by strategic planning and advanced management systems that empower our dedicated team of 300 professionals to excel in their roles.

At the heart of our success is a focus on human excellence and continuous investment in cutting-edge technology. This approach not only enhances our production efficiency but also significantly reduces mould change times, allowing us to meet the soaring

demand for premium concrete products.

Bucomac's foresight and adaptability have enabled us to respond to the evolving needs of the booming construction industry. Our products exceed technical standards and inspire creative architectural designs, offering solutions that are both practical and innovative.

With rigorous quality control and fully automated processes, we ensure that our offerings meet the highest standards for architects, consultants, developers, and local authorities. Over the decades, Bucomac has built a strong reputation for excellence, cultivating a loyal customer base and a portfolio of significant projects throughout the UAE and Gulf region.

Bucomac is dedicated to building a stronger future together, contributing to the region's growth while fostering lasting relationships within the community.

WHY BUCOMAC ?

Quality Concrete Solutions for the Construction Industry

At Bucomac, we take pride in crafting high quality concrete masonry blocks, interlocking tiles, and kerbstone tailored for the construction industry. Our products not only meet but exceed the rigorous standards set by the UAE, ASTM, and BS, ensuring reliability and durability for every project.

Cutting Edge Plant Machinery

Equipped with the advanced MASA R 9001 XL fast version and 9.2 XLS Plants from MASA AG, Germany, Bucomac can efficiently produce a diverse range of concrete blocks and interlocking tiles, meeting the varying needs of our clients.

Uncompromising Quality Control

Our commitment to excellence is evident in our comprehensive quality control processes. From the careful selection of raw materials to the final product, our state-of-the-art laboratories conduct meticulous tests at every stage, guaranteeing that we deliver only the finest results.

Innovative Curing Process

Our products undergo a state-of-the-art curing process within purpose-built chambers utilizing naturally air-circulated systems. This innovative method enhances the strength and quality of our products in a remarkably short time frame.

— Raw Materials

Aggregates:

We source our aggregates from selected crushed aggregate suppliers in Fujairah and RAK, ensuring consistency and quality. Routine analyses and independent testing confirm that our materials meet the highest standards for grading and other critical parameters.

Water:

Our commitment to quality extends to the water used in our manufacturing process. Regular checks and laboratory tests ensure that we maintain the highest standards.

Cement:

For every batch of cement received, we obtain test certificates from our suppliers to verify compliance with BS EN 197-1, & ASTM C150 standards for Ordinary Portland Cement (OPC), and Sulphate Resisting Cement (SRC) ensuring only the best materials are used.

Pigments:

Bucomac's interlocking pavers are produced in wide range of colours like Red, Black, Yellow, Green, Tan, and Beige. We utilize pigments that meet BS1014 standards, allowing us to create tiles that not only perform well but also enhance the aesthetic appeal of any project.

— Cement Compliance

For every batch of cement received, we obtain test certificates from our suppliers to verify compliance with BS EN 197-1:2000 standards for ordinary Portland cement, ensuring only the best materials are used.

— Water Quality Assurance

Our commitment to quality extends to the water used in our manufacturing process. Regular checks and laboratory tests ensure that we maintain the highest standards.

— Continuous Mix Monitoring

Our in-house laboratories are equipped to conduct ongoing analyses, ensuring our products consistently meet market demands and performance expectations.

— Vibrant Pigments

Bucomac's interlocking pavers are available in a vibrant spectrum of colors, including Red, Black, Green, Tan, and Beige. We utilize pigments that meet BS1014 standards, allowing us to create pavers that not only perform well but also enhance the aesthetic appeal of any project.

CONCRETE BLOCKS

01 HOLLOW BLOCKS

Versatile and Strong: The Power of Hollow Blocks

Hollow blocks are a smart solution in modern construction, designed with hollow cavities that make them lighter and more thermally efficient. These blocks are ideal for both load-bearing structures and partition walls, offering builders flexibility in design. Built using traditional masonry techniques, they stack easily with mortar, ensuring stability and strength. Their consistent shape and high dimensional accuracy make them perfect for large scale infrastructure projects while being low maintenance, durable, and cost effective compared to other building materials.

TECHNICAL DATA

Hollow Blocks

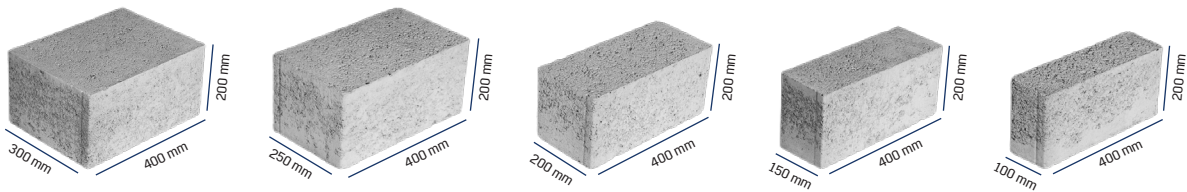

Size (LxWxH) mm	Blocks Bundles	Bundles Trailer	Blocks Trailer	Bundles Truck	Blocks Truck	Kg/Pc

02 SOLID BLOCKS

Solid Foundations Begin with Bucomac Solid Blocks

Bucomac's solid blocks are engineered to meet and exceed modern construction standards, crafted using the latest technology in the region's most advanced facilities. Made from crushed aggregates, sand, and cement, these blocks provide the strength needed for foundation work in all types of structures. Whether you require ordinary Portland cement (OPC) or sulphate-resistant cement (SRC), our solid blocks offer flexibility to meet your specific project needs, ensuring durability and reliability in every build.

03 HOURDI BLOCKS

Multi Utility Masonry for Modern Construction

Bucomac's Hourdi blocks are versatile masonry solutions, made from a mix of crushed aggregates, sand, and cement. These blocks, often used in concrete slab floors, have become increasingly popular for their exceptional thermal and sound insulation properties. Resistant to fire, harsh weather, and aging, Hourdi blocks ensure long lasting performance in various conditions. Produced in a range of standard sizes and custom shapes, they provide a flexible building material that meets the unique requirements of any project.

TECHNICAL DATA

04 THERMAL BLOCKS

Insulation and Efficiency in Every Build

Bucomac's Thermal Blocks are crafted from a blend of selected aggregates, cement, and expanded polystyrene, engineered to enhance thermal efficiency. The polystyrene is strategically placed during molding, ensuring maximum insulation. These blocks are fire-resistant and provide excellent sound insulation, making them ideal for buildings that demand both safety and comfort. Designed with high thermal efficiency, they significantly reduce energy consumption, providing long-lasting value for any structure.

02

INTERLOCKING PAVERS

01 RECTANGULAR PAVERS

Timeless Durability for Any Space

Rectangular pavers are a classic choice, with origins tracing back to ancient Roman roads. Their simple, adaptable design allows for a variety of laying patterns, making them perfect for both practical and decorative applications. These pavers offer exceptional strength and resistance, ideal for high-traffic areas like sidewalks, parks, patios, and walkways. Easy to handle and install, they blend versatility with a timeless aesthetic, ensuring durability in any outdoor space.

Elegance in Every Line

The Rectangular paver combines simplicity with elegance, offering a versatile solution for various paving needs. Its clean lines and balanced proportions evoke a Mediterranean charm, making it ideal for both modern and classic outdoor spaces. Whether used alone or paired with other shapes from the La Plaza series, this paver gives you the flexibility to create unique and sophisticated patterns that enhance the aesthetic appeal of any environment.

02 BEHATON PAVERS

Built for Strength and Stability

The Behaton paver is designed for extreme conditions, offering superior interlocking strength and durability. Its unique shape ensures exceptional stability, making it an ideal choice for industrial areas, parking lots, and spaces that endure heavy vehicular traffic. Behaton pavers are low-maintenance and reliable in all weather conditions, providing a practical, hassle free solution for large-scale projects that require long-lasting performance and minimal upkeep.

03 UNISHAPE PAVERS

Economical Strength for Heavy Traffic

The Uni paver is known for its affordability and widespread use, offering exceptional interlocking strength. With its serrated edges, each block fits seamlessly with the next, creating a solid surface that can withstand heavy loads. This unique shape ensures optimal weight distribution, making it a top choice for areas that see high levels of vehicular and pedestrian traffic. Its durability and cost-effectiveness make the Uni paver ideal for large-scale projects, from commercial spaces to public walkways.

04 MONACO

Featuring 2 types of interlocks:
SQUARE & RHOMBUS

Elevate Your Outdoor Aesthetic

The six-sided Monaco paver, inspired by geometric designs, introduces a modern and artistic element to any outdoor space. Its intricate patterns pair perfectly with square and rectangular pavers, allowing for endless possibilities in design. The Monaco series, with its Mediterranean flair, adds a unique character to large installations, making it ideal for expansive areas. Available in a variety of colors and finishes, the Monaco paver is designed to create striking visual interest while enhancing the beauty and warmth of your environment.

05 SQUARE

Versatile and Practical

Square pavers are a popular choice for a wide range of applications, combining economy with functionality. Designed to withstand heavy pedestrian and light motor traffic, these pavers are ideal for walkways and pathways. Their simple shape allows for easy packing and shipping, while their flexibility enables creative design possibilities. When paired with other shapes like Ladana, Hexagonal, or Rectangular, Square pavers can form diverse patterns, making them an attractive and practical solution for spaces from conservatories to courtyards.

07 LA PLAZA

Featuring 3 types of interlocks:
CUBE, SQUARE & PENTAGON

Let your artistic vision flourish with the La Plaza series.

Designed to seamlessly integrate with square and rectangular pavers, La Plaza empowers you to craft custom patterns and unique designs effortlessly. Its Mediterranean-inspired aesthetics add a touch of elegance to any outdoor project. With an array of eclectic patterns, the La Plaza range transforms your spaces into sophisticated environments, inviting creativity and individuality.

KERB STONES

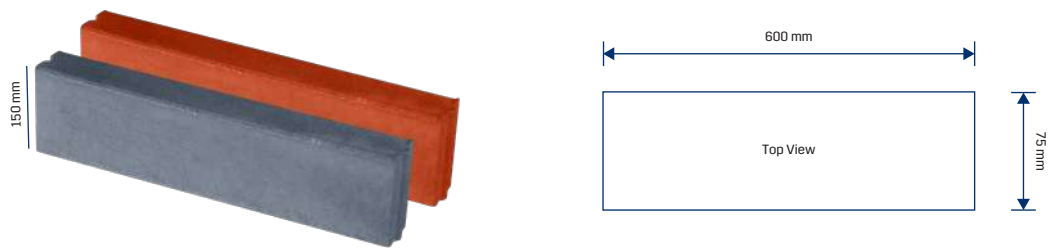

01 HEEL KERB

Versatile & Strong

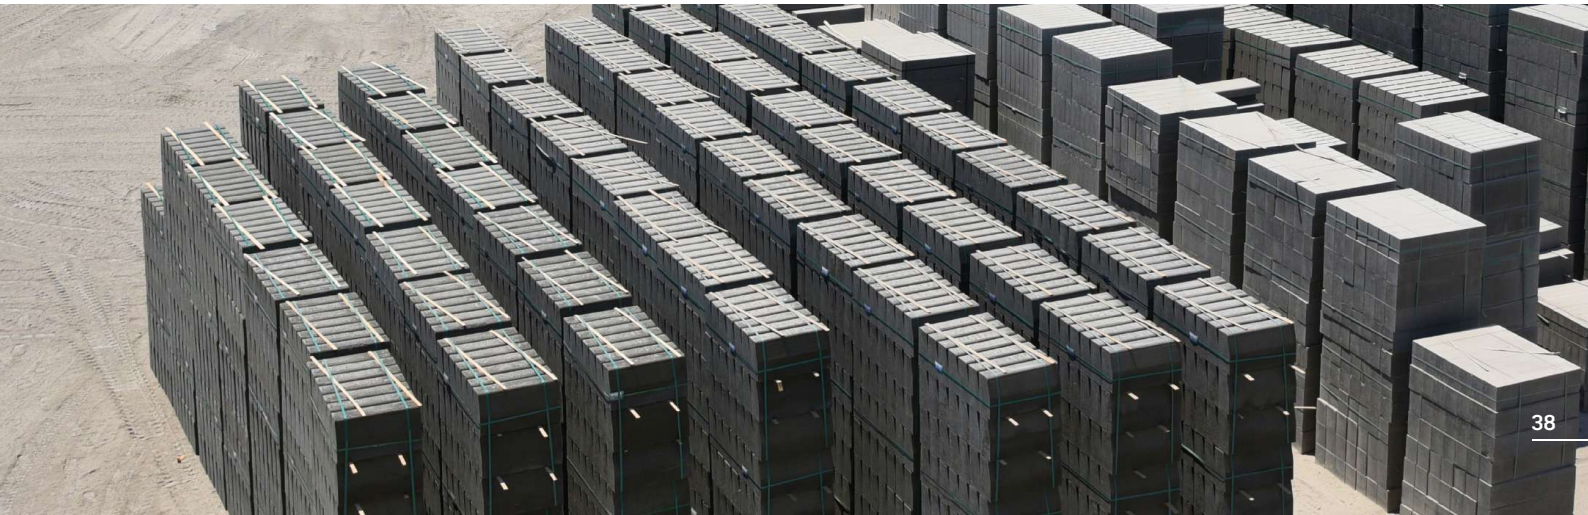

The Heel Kerb offers a cost-effective solution with exceptional versatility, blending seamlessly with various paving styles. Manufactured using two-part vibrating technology, these kerbs are built for maximum strength. The unique dentate design allows each kerb to interlock with the next, ensuring superior connecting strength. Available in a range of colors and finishes, Heel Kerbs deliver both functionality and aesthetic appeal, making them a universal choice for any kerbside project.

02 UPSTAND KERB 1

Durable Edge Restraint for Urban Landscapes

The Upstand Kerb is a robust and versatile solution for edge restraint in roadways, pavements, and urban infrastructure projects. Its trapezoidal design ensures enhanced stability, while its multiple size options accommodate various construction needs. Built to withstand heavy loads and harsh weather conditions, this kerb offers reliable performance in both functional and aesthetic applications. With easy installation and minimal maintenance, the Upstand Kerb is the ideal choice for durable, long-lasting pavement edging solutions.

03 UPSTAND KERB 2

Versatile Strength for Urban and Industrial Paving

The Upstand Kerb 2 is a robust and durable kerbstone designed for high-performance applications. Its solid structure and unique dimensions make it perfect for areas that demand strength and stability, such as sidewalks, industrial zones, and road edges. Manufactured with precision, the Upstand Kerb 2 provides reliable edge restraint while seamlessly blending with various paving styles. Its versatility and durability make it a top choice for both commercial and urban projects, ensuring longevity and minimal maintenance. Available in multiple sizes for tailored installations.

05 FLUSH KERB

A Stylish Solution for Residential Access

Flush kerbs feature clean right-angled edges and straight lines, making them ideal for residential areas with light vehicular traffic. Designed for heavy foot traffic, these kerbs provide a smooth step down for pedestrians, reducing the risk of tripping. Their straight edges facilitate easy installation, especially at driveway entrances, ensuring seamless access for vehicles. Available in a wide range of colours and finishes, flush kerbs can complement any kerbing project, enhancing both functionality and aesthetics. Choose flush kerbs for a safe and stylish solution in your neighborhood.

TEAM SPIRIT

— OUR TEAM SPIRIT

At Bucomac, our success is driven by a committed team of skilled professionals. Each team member brings expertise and dedication, particularly in the production of top-quality masonry and interlocking solutions for the construction industry.

— EXPERIENCED

Our team combines industry veterans and hands-on experts, allowing us to manage projects with precision and execute with efficiency, using only our in-house talent and resources.

— PERMANENT

Bucomac employs a stable workforce of salaried, permanent employees. This continuity ensures a consistent quality standard and deep industry knowledge across all our operations.

— RELIABLE

Every employee is committed to Bucomac's mission, values, and vision, providing clients with exceptional products and services on every project.

— QUALIFIED

We invest in our team's growth, offering training and development to ensure our people are skilled in delivering safe and reliable services across all project environments.

OUR FLEET

At BUCOMAC, we take pride in our extensive fleet of trucks and trailers, ensuring that our products reach our customers promptly and safely. We understand that efficient delivery is crucial for the success of every construction project, and our well-maintained vehicles are equipped to handle the demands of the industry.

Inspection and Maintenance: We ensure that all schedule maintenance is followed, and all inspections are carried in regular basis. These will ensure that our fleet are prepared and well maintain to be used in the road delivery avoiding all delays while we deliver our products to your location.

Safety is at the forefront of our operations. We are committed to following best practices in handling our blocks, ensuring health and safety guidelines are adhered to at every stage of manufacturing process. To maintain a secure working environment, we emphasize the importance of the block layer's workspace. Here are key considerations to ensure safety:

— **Minimized Manual Handling**

We strive to reduce manual handling of blocks by delivering them as close to the working area as possible, all within established safety guidelines.

— **Mechanical Assistance**

When available, blocks are moved in packs using mechanical means, further enhancing safety and efficiency.

— **Safe Loading Practices**

Blocks should be loaded at a minimum height in the truck as per standard circulated by the regulatory body under traffic regulation of UAE to ensure that our fleet are maintain in a way that will not post significant risk to public as well as to our drivers and reducing the risk of injury.

— **Protective Equipment**

We provide and encourage the use of appropriate personal protective equipment at all times to safeguard our workers.

— **Cutting Precautions**

Eye protection and dust suppression measures are essential when mechanically cutting or chiselling blocks, ensuring a safe working atmosphere.

OUR CLIENTS

At BUCOMAC, our commitment to excellence drives everything we do. We strive to provide our clients with the highest quality products and services in the market. Our unwavering focus on exceptional customer care, support, and assistance is the cornerstone of our success.

We recognize that our future as a leading manufacturer of blocks and interlocks is intricately linked to the success of our clients. That's why we dedicate ourselves to understanding their unique needs and challenges.

Our extensive resources spanning our offices, factories, and a robust network throughout the UAE and the region are always at our clients' disposal. Whether you require expert guidance, timely support, or customized solutions, BUCOMAC is here to empower your success. Together, we build a stronger future.
